Overview of Cybersecurity Maturity Model Certification (CMMC) including insight on how to comply with CMMC, different levels & key dates to be aware of, and how you can best prepare your organization for the numerous requirements.

## Workshop Agenda:

### Section #1: Understanding CMMC

- Does your company need to be compliant & to which level?
- Detailed overview of the CMMC model
- Certification levels, requirements, timeline and key dates
- CMMC relationship to NIST and DFARS

### Section #2: Intrusion 101 - Real Life Hacking

- How easily can your organization be compromised?
- Common hacks and intrusions
- Ways that you can enhance your security
- Understanding different security solutions

### Section #3: Ways to Achieve CMMC Compliance

- How does CMMC affect my organization?
- Technology and processes needed to meet CMMC requirements
- Policies and procedures necessary to meet CMMC
- How to prioritize your security resources to meet areas of CMMC
- Organizational next steps to take in achieving compliance

## About the facilitator:

Mark Musone, CISSP, is the Chief Technology Officer at DataSure24 and a co-founder of the company in 2002. Mark has extensive security experience in performing cybersecurity oversight and audit related activities for the Federal Government. For over 18 years, Mark has performed IV&V to ensure compliance and security best practices for various agencies, such as the Department of Labor, EBSA, and PGBC to NIST 800-53 and other standards.

DataSure24, a cybersecurity company, has been providing IT and security services in Buffalo, NY for 15+ years. Services include; 24/7 managed detection & response, rapid incident response, security awareness training and cybersecurity assessments. DataSure24 is proud to be one of the only MSSPs to operate a 24/7 Security Operations Center in WNY. DataSure24 has been named a Top 100 MSSP nationally since 2018.
